Art Unit: 1632

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 20 and 21, drawn to a retroviral expression vector containing DNA sequence for packaging of the vector RNA and for cell-specific expression, such as human endogenous retroviral DNA sequence (HERV), the mRNA or RNA of the retroviral expression vector, host cells containing said vector, and retroviral vector system comprising said retroviral expression vector and a packaging cell line.

Group II, claim(s) 13, drawn to use of HERV for the regulation of the foreign gene expression in retroviral vector.

Group III, claim(s) 14, drawn to use of retroviral expression vector set forth above for gene therapy.

Group IV, claim(s) 15-19, drawn to virion containing the retroviral expression vector RNA, method for the preparation of said virion, and method for the introduction of nucleotide sequence encoding proteins or peptides into eukaryotic cells by using said virion.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The "special technical feature" shared by groups I-

Art Unit: 1632

IV is the HERV promoter or LTR sequences. Sjøttem et al., 1996 (Journal of Virology, Vol. 70, p. 188-198) teaches HERV-H LTR sequences and the HERV-H family has about 1000 full-length elements and a similar number of solitary LTRs. Sjøttem reports that GC/GT box is required for promoter activity and tissue specific Sp1-related protein may be involved in determining the tissue-specific expression pattern of HERV-H elements (e.g. abstract). Thus, the "special technical feature" was not contributed by the present invention over the prior art.

Therefore, Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
